

Brillia PRO-VN

**Low-chemistry photopolymer plate
for newspaper applications**

Designed specifically for high quality newspaper production with violet laser diode-equipped platesetters, Brillia PRO-VN combines the productivity, cost and environmental advantages of low-chemistry plate production with the strengths of FUJIFILM's patented MultiGrain technology.

lo-chem

- ▶ Low-chemistry working with no o loss of quality or productivity
- ▶ No developer required, simple finishing process only
- ▶ Environmentally superior
- ▶ Bright yellow safelight
- ▶ Suitable for up to 200,000 impressions
- ▶ 2 - 98% dot at 100 lpi

Specifications

Brillia PRO-VN	
Print application	newspaper
Laser type	violet LD 405 nm
Sensitivity	0.03 mJ/cm ²
Resolution	2 - 98% at 1200 dpi / 100 lpi
Gauges	0.30 mm
Safelight	Encapsulite G10, OSRAM L36W62
Contrast	excellent
Developer / replenisher	finishing solution (LC-VN), no developer / replenisher required
Bath life	up to 4 weeks or 20 m ² / l
Gum	depending on processor
Run length*	200,000

*Run lengths are always dependent on laser power, processing and press conditions. Figures shown are based on typical newspaper printing conditions.

The FUJIFILM Brillia newspaper CTP plate range supports both thermal and visible light platesetters, with economical processed and low-chemistry options to suit a wide range of newspaper production requirements.
